AI Masterclass 2026 for Data Protection Professionals

Enter AI-Enabled Data Protection

Prepare your firm and administered portfolio for 1 January 2027. Move beyond general awareness to defensible decisions on capacity, registration and officer readiness. Use AI to classify processing operations, identify inconsistencies and triage entities against the twelve criteria. Establish what information may enter an AI tool, what must be withheld and where human review is essential. Build evidence that supports each position, while keeping professional judgement with you. And, get ready for what is coming in the world of Compliance.

Live Labs and Defensible Decisions

Not theory. Work through realistic management company cases with contested processing relationships and an administered portfolio. On your laptop, build a capacity map, triage entities, draft a submission and establish a record of processing operations. Test AI outputs against the evidence, defend your conclusions before peers and leave with four working instruments to apply within your firm.

A practical masterclass for portfolio professionals who must turn data protection obligations into defensible decisions, AI blendeed, evidence, peer challenge & human judgement.

- AI-Assisted Data Protection
- Controller & Processor Registration Readiness
- Lawful AI Permission Mapping
- AI-Assisted Portfolio Triage Grid
- Twelve Criteria, Evidence & Decisions
- xAI (Explainable AI) Data Protection Decisions
- Case-by-Case Submission Packs
- Officer Readiness, Duties, Independence & Conflicts
- Build Your Record of Processing Operations
- Live AI Labs with Peer Challenge to Test Decisions

Course Title	AI-Enabled Data Protection: Capacity, Registration and Officer Readiness for Management Companies
Course Objectives	Equip participants to determine capacity, assess registration needs and plan officer readiness for firms and entities they administer, enabled by AI. Build readiness, using AI, by triaging each entity, testing officer conflicts and planning actions, so firms can defend each position with clear evidence. Enable lawful AI use through permission mapping, data minimisation, controlled tool access and documented human review.
Learning Outcomes	Classify processing operations by capacity, justify controller and processor registration needs, and defend your classifications using evidence. Triage administered entities against twelve criteria, draft a case-by-case submission and maintain a record of processing operations. Build four working instruments through live AI labs, then defend each decision before peers. Laptop fully charged + AI Paid Version (preference: Claude).
