## ➤ AI for Legal, Compliance & Data

Move beyond static checklists to the era of Demonstrable Accountability. We dissect the shift from "trusting the input" to "trusting the decision." You will master the HI-AI Wheel™ to navigate Section 21 of the DPA 2017, ensuring your decisions are legally defensible. We delve into ISO/IEC 27701:2025 and the specific risks of Model Inversion and Data Poisoning that usual Legal & Compliance audits simply ignore at the moment.

## LEARNING BY DOING

*Bring your Laptop, Fully Charged*

### ➤ Legal Agentic AI

Claude CoWork is the first "agentic" legal assistant in the world, designed for desktop-level file management, moving beyond chat interfaces to active workflow execution, with HITL (human-in-the-loop):

- Active Contract Review,
- NDA Triage,
- Contextual Briefings,
- Complex inquiries like DSARs.

### ➤ Incidence Command

Experience real-world compliance and regulator-safe responses to a case like the "Mauritian Data Leaks of Jan 2026 & The Gentlemen Ransom demands" style quiet exfiltration and explore automated Subject Access Requests (SARs), predictive breach modeling, and the Containment Logic Engine. We will show you how to manage the Golden Hour.

### ➤ Fiduciary Diligence

In an era where AI "slop" can lead to significant legal liability, Human-in-the-Loop (HITL) oversight is a fiduciary requirement, not a choice. We move from general chat interfaces to audit and court ready workflows. You will discover how to build "Decision Traceability Logs" that document every AI-assisted outcome, ensuring that when regulators or courts ask, "Who was in control?", you have the immutable evidence to prove it was you.

### ➤ AI you never heard of ..

- Cross-Document Contradiction Detection & Resolution Mapping.
- Temporal Decay Analysis & Obligation Lifecycle Prediction.
- Adversarial Stress Testing & Strategic Vulnerability Mapping.
- Regulatory Arbitrage Mapping & Jurisdictional Risk Surfacing.

**Course Title**  
(for HRDC Application)

**AI Governance and Data Accountability:  
Executive Skills for Regulatory Compliance**

**Course Objectives**

Implement a "dynamic" framework that provides physical evidence of professional diligence.

Tactical literacy to identify and block invisible risks, such as algorithmic bias and data exfiltration, before they escalate into boardroom crises.

Transform incident response into a high-stakes legal & compliance discipline, practicing the real-time collision of commercial, legal, and reputational decision-making.

**Learning Outcomes**

Produce a "Traceability Log" with human oversight, protecting from personal & professional liability.

Execute a forensic mapping of 3rd party ecosystems to identify unauthorized access points and "integrity gaps".

Demonstrate mastery in using advanced legal and compliance AI plugins, as well as the latest functionalities in AI platforms, in line with Prompt 4.0.
